

Is tourism education meeting the needs of the tourism industry?

An Australian case study

at the University of Canberra, Australian Capital Territory, Australia

ABSTRACT

Despite the rapid growth in the provision of tourism higher education in the past 40 years, uncertainties remain about the content and nature of tourism degrees and how these are aligned with the needs of the tourism industry. Some research has been done on tourism higher education curriculum design, but the extent to which tourism higher education meets industry needs has not yet been closely investigated. This study aims to ascertain whether a gap exists between what education institutions provide in their undergraduate curricula in the way of tourism knowledge and skills sets, and what knowledge and skills sets are required by the tourism industry.

A conceptual framework was developed to outline the research process, which involved two steps. First, content analysis of tourism curricula was conducted as the preliminary research. A list of 34 subject areas was synthesised from all core subjects offered in tourism courses in a sample of Australian universities according to subjects' titles, themes and detailed descriptions. A list of 27 skills and abilities was identified by collating university generic skills and tourism discipline attributes from these institutions. Based on the study of tourism curricula, two web-based surveys were then designed and distributed in order to investigate the respective perceptions of industry professionals and academic providers on the subjects and skills sets necessary for tourism employment.

In analysing the data, perceptions about the subjects and skills sets were compared between tourism industry professionals and academic providers. Importance- performance analysis, gap analysis, and SPSS statistical tools were applied to analyse this data.

The study found considerable variance between the views of industry professionals and academic providers in Australia. Their views vary firstly on the relative value of tertiary degrees for tourism professionals; secondly, on the relative merits of skills and abilities needed to work in the tourism sector; and thirdly, on the relative merits of various subjects taught at university. These findings establish the existence of a gap between the existing tourism curriculum at university level, and the needs of the tourism industry. The findings of this study also provide evidence to suggest that tourism higher education provision should not

be isolated from real practice and that those involved in curriculum design should work closely with industry representatives to ensure a strong connection between theory and practice, thus improving the likelihood that graduates of tourism higher education courses will graduate with knowledge and skills sets which are closely aligned with the needs and expectations of the tourism industry.

ACKNOWLEDGEMENTS

Hearty acknowledgments are due to my supervisory panel: Dr Jeremy Huyton for his encouraging and incisive insight and direction throughout the entire process; Dr Helen Ayres, whose attention to detail has assisted me in being more disciplined about my approach to this work; and Dr Brent Ritchie for his advice and encouragement.

My thanks must also go to the Academic Skills Program at the University of Canberra (UC): Dr Joelle Vandermensbrugge, Dr Linda Li and Dr Kate Wilson. Their support and advice on a range of issues that arose in developing this paper was invaluable. Thanks also go to Dr David Peterson for his professional advice about statistical analysis in this study. I wish to thank the Centre for Tourism Research at UC, particularly Pam Faulks for supporting the development and deployment of the survey, and Dr Tracey Dickson for her advice about data analysis.

I would like to thank the International Centre of Excellence in Tourism and Hospitality Education (THE-ICE) and UC for providing me with such an invaluable scholarship. This opportunity has engendered in me a broad international vision. Thanks to Dr Perry Hobson for his encouragement, Jane Malady for her meritorious assistance, Pauline Tang and Liz Fredline. Thanks to the Sustainable Tourism Co-operative Research Centre (STCRC) for distributing the surveys via their newsletter and to all participants in the survey research.

Thanks to my many friends, particularly Deborah White, a person with many years experience in HR across the public, private and university sectors.

Finally, I would especially like to thank my mother, Xiaowei, and my father, Yaozhong, who have taught me to stand on my feet, and my husband, Xiaochun, who has added meaning to my life and contributed to this thesis greatly. Without their love, support and understanding, I would not have been in a position to complete this research.

TABLE OF CONTENTS

LIST OF FIGURES	VI
LIST OF TABLES	VII
APPENDIXES	VIII
ABBREVIATIONS	IX
CHAPTER 1 INTRODUCTION	1
1.1 Background of the study.....	2
1.1.1 The need for qualified employees in the tourism industry in Australia.....	2
1.1.2 The provision of undergraduate tourism education in Australia.....	3
1.2 Statement of research problem	5
1.3 Research aim and research questions	6
1.4 Significance of the study	6
1.5 Definitions of important terms	8
1.6 Method, scope and assumptions	9
1.7 Structure of this study.....	11
1.8 Summary	12
CHAPTER 2 LITERATURE REVIEW	13
2.1 Curriculum definition.....	13
2.2 Curriculum theory and curriculum theorising	15
2.2.1 The development of curriculum work	15
2.2.2 Curriculum theorising.....	17
2.2.3 Curriculum models	17
2.3 Curriculum of tourism management.....	19
2.3.1 Vocational characteristics of tourism curriculum	19
2.3.2 Tourism curriculum research	20
2.3.3 Curriculum model for tourism higher education	23
2.3.4 Debates in tourism curriculum design.....	24
2.4 Tourism employment and education needs for the tourism industry	27
2.4.1 Status of tourism employment and related literature	27
2.4.2 Identifying education needs for the tourism industry	29
2.5 Curriculum decision: what knowledge is of most worth?	31
2.6 All waste is due to isolation?.....	32
2.7 Summary	33
CHAPTER 3 CONCEPTUALISATION AND METHODOLOGY	34
3.1 Conceptualisation: A framework for gap investigation	34
3.2 Content analysis of tourism curricula.....	36
3.2.1 Content analysis of tourism subjects	38
3.2.2 Collation of skills and abilities	51
3.3 Application of the conceptual framework	54
3.3.1 Research paradigm and approach.....	54
3.3.2 Survey method.....	55
3.3.3 Sample design	56
3.3.4 Questionnaire design	60
3.4 Data collection.....	63
3.5 Data analysis	67
3.5.1 Importance-performance analysis	68
3.5.2 Gap analysis	69
3.6 Ethical issues	71
3.7 Limitations of the study.....	71
3.8 Summary	72

CHAPTER 4 RESULTS	74
4.1 Introduction	74
4.2 PART I: Results of the Education Survey.....	74
4.2.1 Response rate of the Education Survey	75
4.2.2 Respondents' profiles	75
4.2.3 Respondents' views on the tourism degree and curriculum	77
4.2.4 Tourism academics' views on skills and abilities	80
4.2.5 Tourism academics' views on subject areas	82
4.2.6 Summary of Part I	84
4.3 PART II: Results of the Industry Survey	86
4.3.1 Response rate of the Industry Survey	87
4.3.2 Respondents' profiles	88
4.3.3 Respondents' views on the tourism degree and curriculum	92
4.3.4 Importance-performance analysis (IPA) of skills and abilities.....	95
4.3.5 Tourism practitioners' views on subject areas	104
4.3.6 Summary of Part II	108
4.4 Conclusion.....	110
CHAPTER 5 DISCUSSION AND CONCLUSION	111
5.1 Introduction	111
5.2 Discussion	111
5.2.1 Finding 1	112
5.2.2 Finding 2	114
5.2.3 Finding 3	116
5.2.4 Implications for theory and practice.....	121
5.2.5 Limitations of this study.....	122
5.3 Conclusion.....	123
5.3.1 Conclusions of this study	123
5.3.2 Recommendation: A consultative framework to bridge the gap.....	125
5.3.3 Areas of further research	127
