

**LEARNING TO SHARE, SHARING TO LEARN:
A CASE STUDY OF THE ENACTMENT OF
SCHOOL IMPROVEMENT IN AN
AUSTRALIAN SPECIALIST SCHOOL**

Sheridan Kerr

MAY 2017

A thesis submitted in fulfilment of the
requirements for the degree of Doctor of
Philosophy at the University of Canberra,
Australian Capital Territory, Australia

Abstract

This thesis presents a case study of school improvement in *Correa Park School*, an Australian specialist school for students with disability. The study sought an in-depth understanding regarding the processes of school improvement from July 2011 to December 2012, as the school *learned to share* and *shared to learn*.

The aims of the study were threefold. First, it sought to describe the distinctive context of a specialist (as opposed to mainstream) school through identifying the affordances and constraints that affected school improvement. The second aim was to examine the learning trajectories of school staff and how they interrelated with accountability and staff culture. Finally, this study sought to clarify school improvement processes in Correa Park, thus developing a conceptualisation of a differentiated approach to school improvement in a non-mainstream context.

The study adopted a situative perspective which views learning as an integral aspect of activity and conceptualises learning as changes in participation in activities (Lave & Wenger, 1991). Situativity emphasises that context is intrinsic to learning, and that the goal of learning is increased participation in a community of learners (Greeno, 1997).

A case study was chosen for the current investigation as it is well-suited to examining the context of contemporary human phenomena with a wide range of variables (Gillham, 2000). There were multiple data sources utilised within the current research. Staff interviews and professional learning evaluations were the primary data sources, and school documents were used as secondary data sources. Data analysis was conducted with NVivo 10 software (QSR International) in an iterative process using segmenting and metadata activities.

The findings showed that school improvement in Correa Park relied on the development of collaborative staff culture and collective accountability. The establishment of shared practices, shared discourse and shared artefacts were a vital step within school improvement processes, overcoming the pervasive constraint of individualisation. The study identified that many school improvement resources had to be adapted from mainstream contexts before they could suit the contextual demands in Correa Park School. This finding suggests that specialist schools may require either extra resourcing to enact school improvement, or need to be

adequately linked with similar specialist schools in order to share both the pedagogical and human resources required for school improvement.

This research is significant because it contributes to the limited base of theoretical and empirical data relating to the enacting of school improvement in a specialist school. It explores the distinctive context of a specialist school, and provides a differentiated model of school improvement based on accountability and staff culture. The development of strong internal accountability may assist specialist schools (whose students may not be well suited to national standardised testing) to address certain difficulties in demonstrating strong external accountability. The insights of the current research are facilitated by a situated perspective of school improvement that allows multiple simultaneous perspectives on staff learning and their context. Finally, the study offers an explanatory model of school improvement in a specialist school which gives a cumulative overview of the processes which underlie the observed changes. The model may be used by Correa Park staff to reflect and prepare for future endeavours, or for policymakers, school executive teams and school staff within other specialist school contexts who are interested in understanding the enactment of school improvement in their own contexts.

Acknowledgments

I wish to thank the following people who assisted me in my learning journey from the beginning of this research:

The staff at Correa Park School for their commitment to excellence and their unending quest for improving learning not only for themselves, but in endlessly creative ways for their students. The support of the school executive team and entire staff team motivated me throughout the project, and afforded me the privilege of learning from the staff as critical friends and co-researchers. I thank Anita whose excitement was contagious and who selflessly produced and laminated so many vocabulary boards for this project. I especially thank Rose, the Correa Park Principal, for her unwavering support. The opportunity to work, and learn, alongside her was a joy.

The students from Correa Park for their inspiring attitude when learning to communicate. Many of the students surprised us, their families and the local community with what and how they communicated. It was incredible to witness, and learn from families, stories of students communicating about weekend activities, their new expressions of preferences and dislikes and wonderfully interesting ways of making requests. In this process, the Correa Park students were, undoubtedly, my greatest teachers.

Associate Professor Chris Kilham, my primary supervisor, for her tireless energy for this project. Her encouragement from the beginning continued for the entire research and even into her retirement. I appreciate her wise guidance, gentle counselling, thoughtful challenging and “forensic” editing.

Members of the ESTEM faculty Professor Ting Wang, Associate Professor David Paterson, (my supervisory panel), plus Associate Professor Affrica Taylor, Professors Barbara Pamphilon and Pam Christie and Dr Kym Simoncini for their insightful advice and support.

Lara Drew for being my office buddy. I value tremendously her staunch friendship, tangibly and over the digital divide, throughout our mutual ups and downs.

Dedication

This thesis is dedicated to my family.

Kristofer- my beloved husband, constant source of love and champion of lifelong learning. You constantly inspired me as you completed your own Master's study so brilliantly. Thank you for keeping me fuelled physically, emotionally, intellectually and spiritually over this long journey.

Boo- my dearest mum, unfailing washerwoman and family supporter. Thank you for ensuring we were all presentable for the last six years. Thanks for sharing the Chandon!

Rafael- our son, passionate reader and family joker. Thank you for encouraging me with your relaxed attitude to all life's tests and your resilience in times of change.

Leonardo- our son, asker of marvellous questions and deep reflector on life. Thank you for your hugs and kisses just when I needed them most.

I love you all and feel blessed to be part of this magnificent family.

Table of Contents

CHAPTER 1 - SCHOOL IMPROVEMENT IN A DISTINCTIVE CONTEXT	1
1.1 The fluid concept of school improvement.....	1
1.2 The centrality of staff professional learning	5
1.3 Purposes of the study and research questions	7
1.4 A framework to guide the research: situativity	9
1.5 The research setting	11
1.6 Significance of the study.....	21
1.7 Outline of the thesis	22
CHAPTER 2 - LITERATURE REVIEW OF SCHOOL IMPROVEMENT	25
2.1 Historical overview of school improvement	27
2.2 Theoretical underpinnings of school improvement	29
2.3 Centralised methods – A focus on accountability.....	34
2.4 Decentralised methods – A focus on staff culture	41
<i>Learning Communities</i>	43
2.5 School improvement in distinctive contexts	49
2.6 Chapter Summary	58
CHAPTER 3 - A SITUATED PERSPECTIVE OF CONTEXT AND LEARNERS	61
3.1 The purpose of a conceptual framework	61
3.2 Overview of the study’s conceptual framework	62
3.3 The theory of situativity.....	67
3.4 A situated approach to school improvement	73
3.5 Chapter summary	81
CHAPTER 4 - RESEARCH DESIGN AND METHODOLOGY - WAYS OF KNOWING ABOUT LEARNERS AND CONTEXTS.....	83
4.1 The research questions.....	83

4.2 Ontological and epistemological stances of the research	84
4.3 The philosophy of qualitative research	85
4.4 Case study	86
4.5 The research context	88
4.6 The professional learning process	90
4.7 Data collection	93
4.8 Data analysis	101
4.9 Study rigour.....	105
<i>Ethical considerations</i>	105
4.10 The researcher’s background and subjectivities	108
4.11 Chapter Summary	112
CHAPTER 5 - INITIAL CONSTRAINTS AND AFFORDANCES WITHIN CORREA PARK.....	113
5.1 The staff culture driver.....	117
5.2 Constraints of staff culture.....	118
5.3 Affordances of staff culture	122
5.4 The role of constraints and affordances in shaping and supporting staff culture.....	126
5.5 The accountability driver	131
5.6 Constraints of accountability	131
5.7 Affordances of accountability	138
5.8 The role of constraints and affordances in shaping and supporting accountability	141
5.9 Chapter summary	147
CHAPTER 6 - CORREA PARK’S STAFF LEARNING TRAJECTORIES TOWARDS SCHOOL IMPROVEMENT	151
6.1 Three learning trajectories of staff from Correa Park.....	153
6.2 Developing a whole school approach.....	155
6.3 Forming common goals	161
6.4 Creating collective practices, discourse and artefacts.....	164

6.5	Do the learning trajectories explain all learning?	174
6.6	Chapter Summary	177
CHAPTER 7- THE PROCESSES OF SCHOOL IMPROVEMENT AT CORREA PARK.....		181
7.1	Phase One: Peripheral Participation	185
7.2	Phase Two: Partial Participation.....	192
7.3	Phase Three: Full Participation.....	199
7.4	Chapter Summary	213
CHAPTER 8 - LEARNING TO SHARE, SHARING TO LEARN: THE ENACTMENT OF SCHOOL IMPROVEMENT AT CORREA PARK		217
8.1	Overview of the study	217
8.2	Major findings and discussion	228
8.3	Limitations of the study	239
8.4	Implications of the research findings for theory and practice	240
8.5	Implications of research findings for future research	243
8.6	Final reflection	245
